STOCK & SON'S SOIL-PAN SERVICE-BOX.

The object of this contrivance is to facilitate the introduction of sanitary improvements into all dwellings of the working class, by the adoption of such an arrangement of cheap soil-pan apparatus as will enable the "sanitary supply system" of water service to be made available for the removal of the refuse, by preventing the entrance of water into places of this description, in which water contamination here is so strongly and so properly objected. By the use of this contrivance an ample supply of water is obtained, without the necessity of its being wasted by stopping the valve, and without the necessity of any other means. It is so constructed that, as long as the discharge-valve remains open, a further supply cannot enter the service from the main. Drawings and description may be obtained from **STOCK & SON**, Manufacturers of Plumbers' Work, Sanitary Closets, Hot-water-down Taps, Fire Plugs, Gas Pipes, and Church Furniture in Iron and Brass, Temple-street, Birmingham.
